

CS 161 Program Submission Checklist

- Readability/Maintainability is 50% of the grade
- Functionality is the other 50% of the grade

The following items affect readability/maintainability (from [coding conventions](#))

Proper Program Header is at top of source code	
Constants are defined above main in ALL_CAPS	
Variable names are meaningful and camelCased	
Correct use of white space (blank lines, tabs, indentation)	
Blocks of code are preceded by a descriptive comment	
Assignments “Technical Details” were all done as specified.	

The following items affect functionality

Program runs and doesn't crash	
User prompts are clear and contain no misspellings	
Output is correct and formatted as specified	
Assignments “Technical Details” were all done as specified.
